Masatoshi Nishiguchi

http://mnishiguchi.com | (202)-509-1887 | nishiguchi.masa@gmail.com

I am a full-stack web developer who is passionate about building semantic and dynamic web applications. I utilize a unique mix of experiences such as working as an industrial sales engineer to be a resourceful developer. I am a careful planner and carry out every task steadily and persistently until it is resolved according to the requirements. I enjoy exploring new technologies with curiosity, and welcome new challenges.

TECHNICAL SKILLS

Very comfortable with Ruby on Rails and Rspec. Comfortable with JavaScript including jQuery, React.js, Angular.js. Some experience with WordPress, PHP, Java, Android, Python, C++.

EXPERIENCE

Web Development Immersive

General Assembly   May 2016–August 2016

Built fluency in full-stack web development through completing an intensive three-month program focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development.

Web Development Assistant

American Petroleum Institute (API)   March 2016–April 2016

Assisted the organization's web development team in debugging the organization's new website before deployment.

Freelance Web Developer   February 2016–March 2016

Created a custom WordPress theme for http://claramlovett.com as the client desired.

Customer Service Coordinator

Nippon Express, USA   September 2011–May 2014

Coordinated the shipments of clients' household goods.

Engineering Sales

ESTIC Corporation   April 2006–March 2011

Worked as a coordinator between customers and in-house engineers while visiting and promoting products to customers.
